

The Future Is Here: Education Driven Risk Management

With the Right Conditions, Everyone Wins

Benefits All In offers a client focused solution which combines individualized benefits expertise with best-in-class enrollment technology to ensure employees and their families choose the benefits that best suit their particular needs.

- EMPLOYEES WIN** – Employees have access to remote consultations with a dedicated specialist. They learn about options both in and out of an employer’s group plan and make the best benefit choices. Employees with more complicated situations receive additional concierge services from the BAI executive resource team.
- EMPLOYERS WIN** – As employees choose to appropriate other favorable healthcare resources, the cost of health insurance becomes more sustainable.
- BROKERS WIN** – As brokers use this client focused solution, they impact the employer relationship in a way that strengthens account retention and loyalty while increasing revenue.

Enriching Employee Benefit Options With Education

Benefits All In is proud to partner with preferred vendors to offer a full suite of products and services designed to better protect employees. Each vendor's suite can be seamlessly added to the Benefits All In process to better serve employee needs, support administrative costs and provide brokers with an additional source of revenue.
